

Since this Wisconsin no call list has been implemented, life is so much more peaceful. I no longer receive phone calls from approx. 10am in the morning until 7:59pm trying to sell me products and services that I have no need for. Before we had the do not call list, I would ask these people to mail me the information and let me look at it before I would ever decide on signing up for anything. To this date, if they want my attention, they can mail me the information. Please don't change what has been working great for the last few years

Steve Lehman
